ACKNOWLEDGMENT

This monograph is based on the papers from a technical review on "Individual Differences in the Biobehavioral Etiology of Drug Abuse" held on September 13-14, 1993. The review meeting was sponsored by the National Institute on Drug Abuse.

## Introduction: Individual Differences in the Biobehavioral Etiology of Drug Abuse
Harold W. Gordon and Meyer D. Glantz

---

## Genetic Factors in Drug Abuse and Dependence
David E. Comings

---

## Discussion

---

## Genotype-Environment Correlations and Interactions in the Etiology of Substance Abuse and Related Behaviors
Matt McGue, David T. Lykken, and William G. Iacono

---

## Discussion

---

## An Identical Twin High-Risk Study of Biobehavioral Vulnerability
Ming T. Tsuang and Michael J. Lyons

---

## Discussion

---

## Commentary
George R. Uhl

---

## Psychophysiological Prediction of Substance Abuse
William G. Iacono, David T. Lykken, and Matt McGue

---

## Commentary
Scott E. Lukas

---

## Discussion

---

## Cognitive Event-Related Potentials in Populations at Risk for Substance Abuse
Ronald I. Herning
