

Appendix B

Annotated Survey Instruments (By Round)

Round 1

INTRODUCTION

Appendix B contains separate composite annotated survey instruments for Round 1, Round 2, and Round 3 of the NSPY. Round 1 contains a child and a teen instrument and an abbreviated parent instrument. Rounds 2 and 3 contain a teen instrument and an abbreviated parent instrument. The Child and Teen instruments are shown in their entirety; whereas, only a few questions that represent parent variables added to each youth record are shown in the abbreviated Parent instrument.

The annotated survey instruments are in a format similar to the ones produced for the analytic reports. These hard-copy survey instruments were programmed to an electronic format. Information in boxes contain skip pattern instructions and other directions used by the programmers to construct the electronic versions of the instruments. Question numbering is not necessarily consecutive, since some questions were either reordered or eliminated (due to time constraints) prior to instrument administration. Also, hot words, which are in bolded italics in the text, appear on the ACASI computer screen in a different color than the other text. When a respondent touches the screen on a hot word, a second screen appears that provides an explanation for the word or gives a definition for the word. The hot word text does not appear in these instruments.

If a question was asked during any data collection wave within a round, it is included in the hard copy instrument for that round. In addition, each question has the interview variable name assigned to the question and a recode variable name associated with the question when one is available. When no recode variable was constructed, an N/A is recorded. Interview variables with an asterisk are variables that are not contained in the public use file but are included in the survey instrument.

National Survey of Parents and Youth

Child Annotated Instrument

Round 1

INTRODUCTION:

We are conducting a survey for the National Institute on Drug Abuse. It is the leading research organization on drug abuse in the U.S. We need to learn much more about why some young people try drugs and why others do not.

Thank you for agreeing to participate in this study. It will take about 35 minutes to complete your interview. Your participation is voluntary. This means that it is your decision. No one can force you to participate. If you do not wish to answer this survey, you or members of your family will not be penalized in any way or lose any benefits. You can also skip any question that you do not wish to answer.

However, your answers are very important to us. There are no right or wrong answers. The answers you give will be kept private as required by law. Therefore, we hope that you will answer each question thoughtfully and honestly.

NOTE: Words bolded and in italics are “hot words.”

BOX A0a

IF PARENT IS CHOSEN IN THE SCREENER, THEN USE THE TERM “PARENTS” THROUGHOUT THE QUESTIONNAIRE (RELATIONSHIP SCREENER CODES = 1, 2, OR 3). IF NO PARENT IS IN THE HOUSEHOLD, THEN USE THE TERM “CAREGIVERS” THROUGHOUT THE QUESTIONNAIRE (RELATIONSHIP SCREENER CODES = 1, 2, OR 3).

National Survey of Parents and Youth

Teen Annotated Instrument

Round 1

INTRODUCTION:

We are conducting a survey for the National Institute on Drug Abuse. It is the leading research organization on drug abuse in the U.S. We need to learn much more about why some young people try drugs and why others do not.

Thank you for agreeing to participate in this study. It will take about 45 minutes to complete your interview. Your participation is voluntary. This means that it is your decision. No one can force you to participate. If you do not wish to answer this survey, you or members of your family will not be penalized in any way or lose any benefits. You can also skip any question that you do not wish to answer.

However, your answers are very important to us. There are no right or wrong answers. Westat has obtained a special Certificate of Confidentiality for this survey. Under this certificate, the Federal government pledges that Westat study personnel cannot be compelled by any person, or court of law, to release your name or to identify your name with any answers that are given. Any information you give will be kept confidential unless otherwise compelled by law. Confidential means that your answers are kept private. Therefore, we hope that you will answer each question thoughtfully and honestly.

NOTE: Words bolded and in italics are “hot words.”

National Survey of Parents and Youth
Parent Annotated Instrument (Abbreviated)
Round 1

INTRODUCTION

INTRODUCTION FOR PARENT WHO DID NOT COMPLETE SCREENER:

We are conducting a survey for the National Institute on Drug Abuse, which is part of the National Institutes of Health. It is the leading research organization on drug abuse in the U.S. The purpose of this study is to help identify attitudes and information that influence drug use among children and teens.

Thank you for agreeing to participate in this study. This interview will take about 60 minutes to complete. Your participation is voluntary and any information you give will be kept confidential unless otherwise compelled by law. If you do not wish to participate, or do not want to answer particular questions, this will not result in any penalty or loss of benefits to you or your family.

However, your answers are very important to us. There are no right or wrong answers. Westat has obtained a special Certificate of Confidentiality for this survey. Under this certificate, the Federal government pledges that Westat study personnel cannot be compelled by any person, or court of law, to release your name or to identify your name with any answers that are given. Therefore, we hope that you will answer each question as thoughtfully and honestly as possible.

I will be asking you questions about yourself and about your {AGE-FILL} year-old child, {CHILD1 NAME-FILL} {and your (AGE-FILL) year-old child, (CHILD2 NAME-FILL)}.

Many of these questions refer to *illicit drugs*. Illicit drugs are substances such as *marijuana, inhalants, cocaine, heroin, hallucinogens*, and *methamphetamine*. They also include pain killers, tranquilizers, stimulants, sedatives, or barbiturates when they are not prescribed for you. We are not interested in drugs you can buy over-the-counter without a prescription, such as aspirin. When I mention drugs in the following questions, I am referring to illicit drugs.

Round 2

INTRODUCTION

Appendix A contains separate composite annotated survey instruments for Round 1, Round 2, and Round 3 of the NSPY. Round 1 contains a child and a teen instrument and an abbreviated parent instrument. Rounds 2 and 3 contain a teen instrument and an abbreviated parent instrument. The Child and Teen instruments are shown in their entirety; whereas, only a few questions that represent parent variables added to each youth record are shown in the abbreviated Parent instrument.

The annotated survey instruments are in a format similar to the ones produced for the analytic reports. These hard-copy survey instruments were programmed to an electronic format. Information in boxes contain skip pattern instructions and other directions used by the programmers to construct the electronic versions of the instruments. Question numbering is not necessarily consecutive, since some questions were either reordered or eliminated (due to time constraints) prior to instrument administration. Also, hot words, which are in bolded italics in the text, appear on the ACASI computer screen in a different color than the other text. When a respondent touches the screen on a hot word, a second screen appears that provides an explanation for the word or gives a definition for the word. The hot word text does not appear in these instruments.

If a question was asked during any data collection wave within a round, it is included in the hard copy instrument for that round. In addition, each question has the interview variable name assigned to the question and a recode variable name associated with the question when one is available. When no recode variable was constructed, an N/A is recorded. Interview variables with an asterisk are variables that are not contained in the public use file but are included in the survey instrument.

INTRODUCTION:

We are conducting a follow-up survey for the National Institute on Drug Abuse. It is the leading research organization on drug abuse in the U.S. We need to learn much more about why some young people try drugs and why others do not. You may recall that you were interviewed for this study in the past.

Thank you for agreeing to participate in this study. It will take about 45 minutes to complete your interview. Your participation is voluntary. This means that it is your decision. No one can force you to participate. If you do not wish to answer this survey, you or members of your family will not be penalized in any way or lose any benefits. You can also skip any question that you do not wish to answer.

However, your answers are very important to us. There are no right or wrong answers. Westat has obtained a special Certificate of Confidentiality for this survey. Under this certificate, the Federal government pledges that Westat study personnel cannot be compelled by any person, or court of law, to release your name or to identify your name with any answers that are given. Any information you give will be kept confidential. Confidential means that your answers are kept private. Therefore, we hope that you will answer each question thoughtfully and honestly.

NOTE: Words bolded and in italics are "hot words."

INTRODUCTION

INTRODUCTION FOR NEW PARENT WHO DID NOT COMPLETE BASELINE PARENT INTERVIEW:

We are conducting a survey for the National Institute on Drug Abuse, which is part of the National Institutes of Health. It is the leading research organization on drug abuse in the U.S. The purpose of this study is to help identify attitudes and information that influence drug use among children and teens.

Thank you for agreeing to participate in this study. This interview will take about 55 minutes to complete. Your participation is voluntary and any information you give will be kept confidential unless otherwise compelled by law. If you do not wish to participate, or do not want to answer particular questions, this will not result in any penalty or loss of benefits to you or your family.

However, your answers are very important to us. There are no right or wrong answers. Westat has obtained a special Certificate of Confidentiality for this survey. Under this certificate, the Federal government pledges that Westat study personnel cannot be compelled by any person, or court of law, to release your name or to identify your name with any answers that are given. Therefore, we hope that you will answer each question as thoughtfully and honestly as possible.

I will be asking you questions about yourself and about your {AGE-FILL} year-old child, {CHILD1 NAME-FILL} {and your (AGE-FILL) year-old child, (CHILD2 NAME-FILL)}.

B. COMMUNICATION WITH CHILD: CAPI

Many of these questions refer to *illicit drugs*. Illicit drugs are substances such as *marijuana, inhalants, cocaine, heroin, hallucinogens*, and *methamphetamine*. They also include pain killers, tranquilizers, stimulants, sedatives, or barbiturates when they are not prescribed for you. We are not interested in drugs you can buy over-the-counter without a prescription, such as aspirin. When I mention drugs in the following questions, I am referring to illicit drugs.

B2. In the **last 6 months**, how often have you {or your (partner/coparent)} and {CHILD NAME-FILL} talked about drugs? Would you say ...

Round 3

INTRODUCTION

Appendix B contains separate composite annotated survey instruments for Round 1, Round 2, and Round 3 of the NSPY. Round 1 contains a child and a teen instrument and an abbreviated parent instrument. Rounds 2 and 3 contain a teen instrument and an abbreviated parent instrument. The Child and Teen instruments are shown in their entirety; whereas, only a few questions that represent parent variables added to each youth record are shown in the abbreviated Parent instrument.

The annotated survey instruments are in a format similar to the ones produced for the analytic reports. These hard-copy survey instruments were programmed to an electronic format. Information in boxes contain skip pattern instructions and other directions used by the programmers to construct the electronic versions of the instruments. Question numbering is not necessarily consecutive, since some questions were either reordered or eliminated (due to time constraints) prior to instrument administration. Also, hot words, which are in bolded italics in the text, appear on the ACASI computer screen in a different color than the other text. When a respondent touches the screen on a hot word, a second screen appears that provides an explanation for the word or gives a definition for the word. The hot word text does not appear in these instruments.

If a question was asked during any data collection wave within a round, it is included in the hard copy instrument for that round. In addition, each question has the interview variable name assigned to the question and a recode variable name associated with the question when one is available. When no recode variable was constructed, an N/A is recorded. Interview variables with an asterisk are variables that are not contained in the public use file but are included in the survey instrument.

Round 3

INTRODUCTION:

We are conducting a follow-up survey for the National Institute on Drug Abuse. It is the leading research organization on drug abuse in the U.S. We need to learn much more about why some young people try drugs and why others do not. You may recall that you were interviewed for this study in the past.

Thank you for agreeing to participate in this study. It will take about 45 minutes to complete your interview. Your participation is voluntary. This means that it is your decision. No one can force you to participate. If you do not wish to answer this survey, you or members of your family will not be penalized in any way or lose any benefits. You can also skip any question that you do not wish to answer.

However, your answers are very important to us. There are no right or wrong answers. Westat has obtained a special Certificate of Confidentiality for this survey. Under this certificate, the Federal government pledges that Westat study personnel cannot be compelled by any person, or court of law, to release your name or to identify your name with any answers that are given. Any information you give will be kept confidential. Confidential means that your answers are kept private. Therefore, we hope that you will answer each question thoughtfully and honestly.

NOTE: Words bolded and in italics are “hot words.”

National Survey of Parents and Youth
Parent Annotated Instrument (abbreviated)
Round 3

INTRODUCTION

INTRODUCTION FOR NEW PARENT WHO DID NOT COMPLETE BASELINE PARENT INTERVIEW:

We are conducting a survey for the National Institute on Drug Abuse, which is part of the National Institutes of Health. It is the leading research organization on drug abuse in the U.S. The purpose of this study is to help identify attitudes and information that influence drug use among children and teens.

Thank you for agreeing to participate in this study. This interview will take about 55 minutes to complete. Your participation is voluntary and any information you give will be kept confidential unless otherwise compelled by law. If you do not wish to participate, or do not want to answer particular questions, this will not result in any penalty or loss of benefits to you or your family.

However, your answers are very important to us. There are no right or wrong answers. Westat has obtained a special Certificate of Confidentiality for this survey. Under this certificate, the Federal government pledges that Westat study personnel cannot be compelled by any person, or court of law, to release your name or to identify your name with any answers that are given. Therefore, we hope that you will answer each question as thoughtfully and honestly as possible.

I will be asking you questions about yourself and about your {AGE-FILL} year-old child, {CHILD1 NAME-FILL} {and your (AGE-FILL) year-old child, (CHILD2 NAME-FILL)}.

B. Communication with Child: CAPI

Many of these questions refer to **illicit drugs**. Illicit drugs are substances such as **marijuana, inhalants, cocaine, heroin, hallucinogens**, and **methamphetamine**. They also include pain killers, tranquilizers, stimulants, sedatives, or barbiturates when they are not prescribed for you. We are not interested in drugs you can buy over-the-counter without a prescription, such as aspirin. When I mention drugs in the following questions, I am referring to illicit drugs.

B2. In the **last 6 months**, how often have you {or your (partner/coparent)} and {CHILD NAME-FILL} talked about drugs? Would you say ...
